

JANUARY—FEBRUARY SPECIALS

The All Purpose Cleaning Detergent

Features:

- Excellent wetting (detergency) across a broad temperature range
- Very low foaming under dynamic conditions even at ambient Temperature
- Corrosion inhibitor incorporated into the formulation
- Mild alkaline formulation
- Improved performance in hard water
- No irritating or hazardous ingredients
- Excellent in systems operating under dynamic conditions where continuous, rapid surface-interface formation requires quick migration of surfactant to effect good wetting.

Ideal for use on: Surgical Instruments, Dental Instruments, Surgical Tables and Chairs, Benchtops, Tiles, Walls & Floors, Environment

A clinical detergent specially formulated to meet the requirements of AS/NZS 4187-2003 & ASINZS 4815-2001

CLEANING BEFORE STERILIZING

Cleaning is a vital step for preventing cross infection when reusing surgical instruments & equipment. The sterilizing process will not work if there is residual soil or film. The outer coating of the bio-film will simply harden & the underlying organic material will be untouched, leaving a potential source of cross infection. A cleaning agent is necessary to effectively remove soil & organic matter. The cleaning agent will solubilise & emulsify soil through the action of surfactants. The effectiveness of the cleaning agent is greatly enhanced by mechanical action, such as manual brushing, ultrasonic cleaners or mechanical washers.

This product has been approved by AGPAL as appropriate in assisting practices in accreditation

5L Clinident	\$30.00 + gst
500ml Spray Bottle Only	\$4.10 + gst
Pump (for 5L	\$5.20 + gst

Instructions: Use 1 pump (8ml) per 2 litres of water.

SONICLEAN DIGITAL BENCHTOP ULTRASONIC CLEANERS

3L 160TD SONICLEAN \$1075 rrp **OUR SPECIAL \$925**
6L 250TD SONICLEAN \$1545 rrp **OUR SPECIAL \$1395**
10L 500TD SONICLEAN \$2535 rrp **OUR SPECIAL \$2385**
Above prices do not include GST and freight cost.

Our new digital unit is easily programmed to the operator's exact requirements, and the intelligent software memory stores these settings for the next usage. The operator can accurately program cycle settings such as clean time, degas time, power level, heater temperature and power duty cycle to prevent processing above set temperatures.

Other features:

- 2-year warranty on parts and workmanship.
- All models include stainless steel lid, perforated instrument tray & drain outlet.
- Adjustable digital countdown timer from 1-60 minutes by pressing "More" or "Less" key buttons.
- At the end of the cleaning process, the "End" message displays with long beep.
- Variable temperature control up to max 60C and duty cycle options for heater models only.
- Degassing function. -Variable ultrasonic power levels. -Programmable user setup and status display
- Optional electronic lid interlock to prevent normal operation if lid is open.
- When any key is pressed a short audible feedback is provided. This sound can also be turned off during the setup.
- Transducer protection against thermal shock, mechanical shock and empty tank operation.

Medi-ComBlue & QRS Universal ECG

Medi-ComBlue

The Medicom Blue wireless adaptor allows GPs, specialists and nurses to work free of cables and computer configuration problems, confident that the diagnostic data are being accurately captured on the client's notes. Whether you have a small, one-bed practice or work in a multiple bed setting in a large practice or hospital, Medicom Blue is your key to safe, accurate diagnostics.

Medicom Blue allows you to set up a wireless adaptor on the server with the ECG and spirometry software through a terminal server session (access to applications and data stored on a remote computer over a network). This gives you full and seamless access to any computer on the network.

When used together this creates the ultimate portable ECG that is fully computer based but does not require a direct hook-up to the computer. The blue tooth enables the ECG to interface with the computer via a wireless connection .

This enables you to have a fully portable ECG that can be used in any room of your surgery and have the results directly displayed into Medical Director for instant review.

QRS Universal ECG

The smallest and lightest 12-channel ECG on the market.

- Automatic narrative interpretation and measurement analysis using the advanced Louvaine Algorithm, which has the **best total accuracy**, when compared to leading competitors.
- Print full page reports on standard plain paper in portrait, landscape or A4.
- Review and zoom into data with electronic calipers, enter comments and modify the interpretation before confirming the results.
- Instantly create PDFs or JPEGs of the final report.
- Seamlessly integrate ECG data into your EMR via XML, HL7 and other formats.
